

# **Allweld** Marine & Industrial

*"The Best in the Weld"*

## **HIGH PRESSURE PIPE AND TESTING**

Allweld has a dedicated team of welders that are coded to our qualified welding procedures (PQR).

Allweld has qualified most of the materials that are used for high pressure pipe like 4130 CR MO, duplex s/steel and a range of chrome steels and carbon steels.

Allweld does pipework on site and in our workshop. We also have a dedicated heat treatment department that compliments pipe that has to be preheated and stress relieved.

Allweld can pressure test pieces to 2980 bar.
